

# kids on the move bridges

## ABA class

ABA Therapy has been proven to help kids with Autism Spectrum Disorders develop important skills that improves their lives.

### For Kids Who Need Help With :

- Paying attention
- Social engagement and awareness
- Meaningful language development
- Behavior management
- Educational and cognitive concepts
- Fine motor skills
- Sensory regulation

### What We Offer:

- Research based therapy
- Individualized skill development
- Expert staff
- Customized programs

### Classroom Information:

- Classes are three hour
- There are five to six work sessions per class
- Each work session involves two children and one adult
- Free play breaks occur regularly
- Early Start Denver Model techniques are used with children during breaks to maximize social and play opportunities with children
- Sensory focused activities occur throughout

*"Since my daughter  
started ABA Therapy  
I can see such a  
difference."*
